

JÖNKÖPING UNIVERSITY
School of Engineering

Application for exemption from course entry requirements

Degree of Master of Science (60 credits) with a major in Product development,
specialisation in Materials and Manufacturing

If you do not fulfil the entry requirements but **have a long and relevant professional experience** within the foundry industry, you can apply for an exemption from these requirements. If your application is approved, you will obtain course credits after completing single courses with the grade of Pass.

The application should include a brief description of relevant professional experience and completed past degrees and courses.
